

It shall be the policy of the Mingo County Board of Education that homework is often a necessary and integral part of the total educational process, and as such, the habit of homework needs to be initiated early in the school experience of the student. Homework assigned for home study, should be clear and definite, and should correlate with the topics of lessons, discussions, reviews, and tests. Written homework should always be inspected by the teacher, returned to, and discussed with the student (s).

Principals and school staff members shall develop and implement school homework policies to coordinate homework assignments; however, the scheduling of homework is to be kept flexible and cannot exceed more than thirty (30) minutes in any one homework subject. Homework should be used for reinforcement; homework should never be excessive.
